

Freshways Gender Pay Gap Report- 2024

What is Gender Pay Gap?

The Gender Pay Gap Information Act 2021 came into effect in July 2021. Employers with 250 or more employees are required to publish statutory calculations every year showing how large the pay gap is between their male and female employees. The gender pay gap shows the difference in the average hourly earnings of men and women across an organisation regardless of their roles or industry sectors.

It is important to have a clear understanding of what the gender pay gap tells us or doesn't tell us. The gender pay gap is not the same as equal pay. Equal pay is our legal obligation as an employer to give men and women equal pay for the same jobs, similar jobs or work of equal value. At Freshways Food Company our pay and rewards practices are applied equally to everyone regardless of gender.

We chose the period below in which to publish our Gender Pay gap data for 2024

- **Snapshot Date: 30 June 2024**
- **Published on: 30 December 2024**
- **Total Employees: 291 (Male 165 / Female 126)**

There are two ways to measure the Pay Gap

1. Median Pay Gap

This represents the middle point of a population. If you lined up all of the women at a company and all of the men, the median pay gap is the difference between the hourly rate of pay for the middle woman compared to the hourly rate of pay for the middle man.

2. Mean Pay Gap

The Mean Gender pay gap is the difference between the average hourly rate of pay for women, compared to the average hourly rate of pay for men, within a company.

Freshways Food Company Gender Pay Analysis

The Freshways Food Company Gender Pay Gap Analysis is as follows

All Employees

Mean	Median
16.7%	17.4%

Part time Employees

On the snapshot date we had 17 part time employees, 14 female and 3 male.

Mean	Median
-9.6%	10.3%

Employees on Temporary contracts

On the Snapshot date we had no employee on Temporary contracts

Benefit in Kind

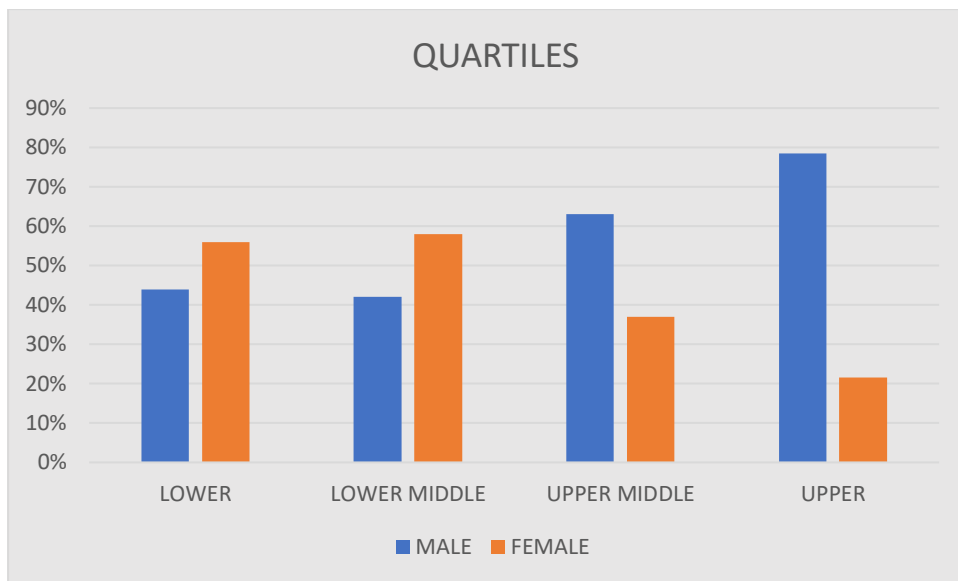

The legislation requires us to report on the % of employees receiving benefit in kind, which we have outlined below. On the snapshot date 5 employees received BIK in some form.

Male	Female
1.8%	1.6%

Bonus

The legislation requires us to report on the % of employees receiving Bonus. Bonus payments are not part of our remuneration package.

Pay Quartiles

Pay per quartile is calculated as the percentage of male and female employees in four equal sized groups based on their hourly pay rate.

We can see a Gender imbalance in the Lower and Higher quartile. There are more women in the Lower Quartile mainly due to the number of part time workers in this group who are majority women.

The Upper quartile is majority male. Our senior leadership team and second tier managers are fairly evenly split between men and women so this pay disparity is explained by the shift allowance and commission payments of our night shift and Van sales team. These jobs require a high level of physical strength and require working antisocial hours which appear to suit men more than women

Freshways Food Company is committed to improving our Gender Pay gap in the future by continuing to employ men and women equally and by giving equal opportunities to all for progression and improvement.
